OCTOBER 2026

1 Brief Information about the Project

Project Title	Sports Website – Sports & Gaming Showcase Web Page
Course	CS3303 Full Stack Development (CIE – 2), Semester V, BCA (Hons)
Developer	S Bala Murugan Adarsh (Individual project)
USN	1RUA24BCA0076
Faculty	Prof. Mohammed Danish
Project File	sports-website/index.html (opened in Google Chrome)

Introduction

Sports Website is a responsive, single-page web site that presents a modern sports and gaming platform. A visitor lands on a full-screen hero banner and can move through the About Us and Our Services sections using a fixed navigation bar. The site introduces three experiences – 3D Sports, Arcade and Virtual Reality – each shown as a card with an image, a short description and a Read More button. The project was developed independently for the Full Stack Development course to practise building a clean, attractive front-end with HTML and CSS.

Objectives

- Design an attractive, user-friendly sports website with a bold hero banner.
- Structure the page semantically using HTML5 sections and anchor-link navigation.
- Style the layout with CSS3 using flexbox/grid, cards, buttons and hover effects.
- Present information clearly through the About Us and Our Services sections.
- Practise testing the web page in a browser and preparing professional documentation.

Technologies Used

Area	Technology	Purpose
Markup	HTML5	Page structure, sections and anchor navigation
Styling	CSS3	Layout, colours, cards, buttons and hover effects
Editor	Visual Studio Code	Writing and debugging code
Browser	Google Chrome	Running and testing the web page

Key Features

Feature	Description
Navigation bar	Top menu with SPORTS, ABOUT US, SERVICES, INDOOR, OUTDOOR and SPORTS links that jump to the matching section of the page.
Hero section	Full-screen banner with a football artwork background, the SPORTS heading, a tagline and a short introduction.
About Us	Text introduction on the left, a neon football-player illustration on the right and a glowing Read More button.
Our Services	Three cards – 3D Sports, Arcade and Virtual Reality – each with an image, description and Read More button.
Hover highlight	A card is enlarged and given a cyan border when the mouse is over it, drawing the visitor's attention.
Dark neon theme	Dark background with cyan accent buttons and colourful artwork for a modern gaming feel.

Working Flow

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5	STEP 6
Open the Home Page	**Use the Navigation Bar**	**Read the About Us**	**Explore Our Services**	**Hover over a Service Card**	**Click Read More**

Conclusion and Future Scope

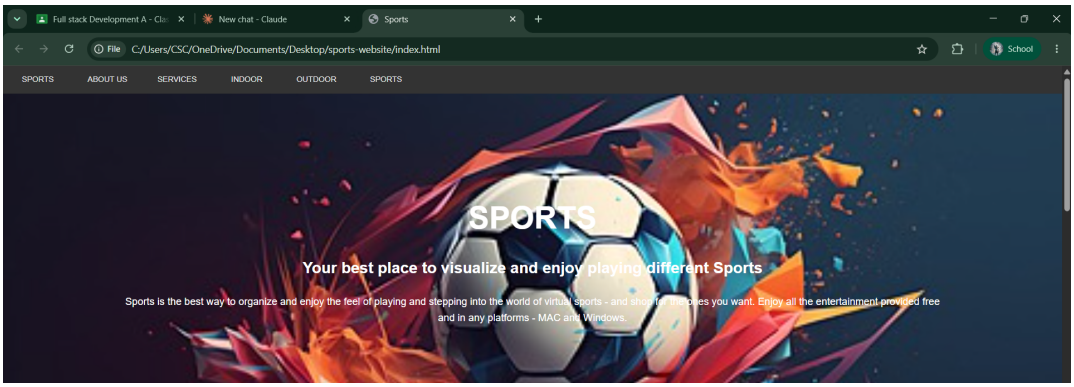

The project demonstrates how HTML and CSS work together to deliver a visually appealing and easy-to-navigate sports website. Building it strengthened my understanding of page structure, anchor navigation, responsive layouts, card design and hover effects. In future, the website can be extended with:

- JavaScript or React.js for interactive features such as sliders, modals and live search.
- Dedicated Indoor and Outdoor sports pages with detailed information and booking options.
- A Node.js and Express back-end with a database for user accounts, bookings and contact forms.

2 Screenshots of the Project

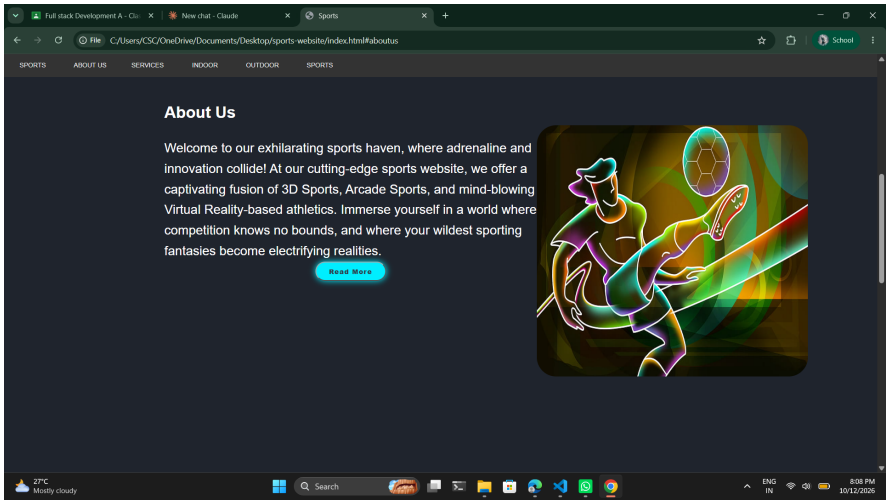

The following screenshots show the main sections of the website.

FIG 1 Home Page

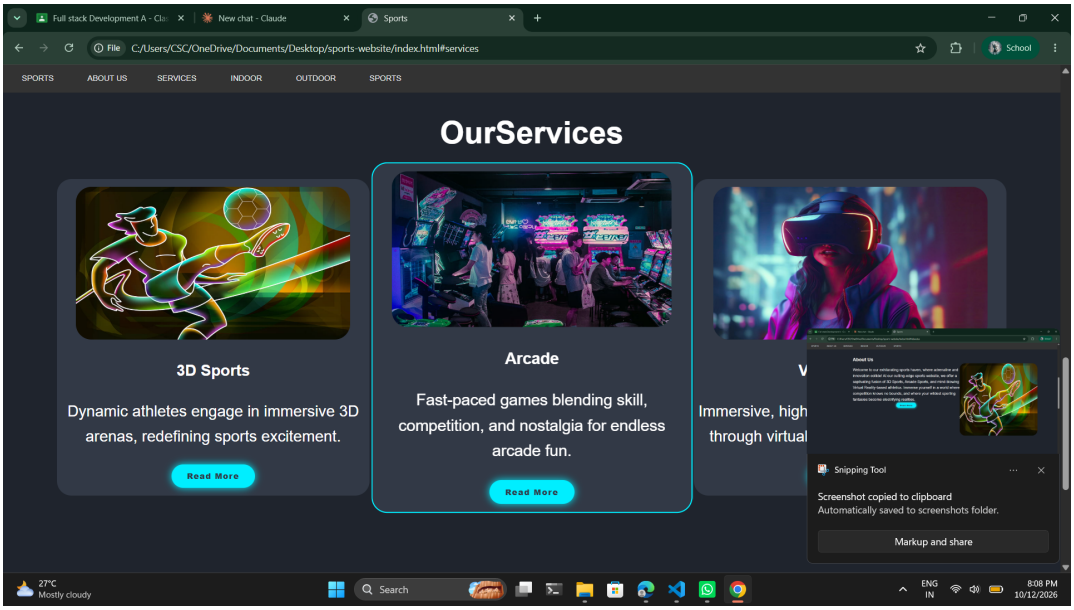

Home page with the navigation bar and the full-screen SPORTS hero banner.

FIG 2 About Us Section

About Us section with the introduction text, illustration and Read More button.

FIG 3 **Our Services Section**

Our Services cards for 3D Sports, Arcade and Virtual Reality, with the hovered card highlighted.
